### Profile

I have been working as a software developer for 4 years. During this time, I worked as a full stack developer in business layer development in many projects. I like working with new technologies, so I prefer to use new technologies in projects if given the opportunity and if it provides new advantages to the project. I love working as a team member and being part of a whole. I am open to self-improvement. I work with determination, patience and devotion to achieve success in my studies.

### Education

|   |           |
|---|-----------|
| <b>Macit Zeren Science High School</b>  | 2007-2011 |
| Amasya  |           |
| <b>Ankara University Faculty Of Engineering Computer Engineering Department</b> | 2011-2017 |
| Ankara  |           |

### Experience

|  |                    |
|--|--------------------|
| <b>Ministry Of National Defense General Directorate Of Mapping</b> | Dec 2018 – Present |
| Computer-Software Engineer, Ankara                                 |                    |

In a multi-purpose project with about 15 modules containing authentication, authorization and special requirements I worked as a full stack developer. In this project java, jpa(hibernate), spring, primefaces etc. i used it. I wrote this project according to multi-tier architecture.

Also, as a full stack developer, I worked on 3 different applications. This project runs on docker on both linux and windows servers as two separate projects, serverside and clientside. It is written in a multi-layered architecture. I used angular on the clientside, nodejs on the serverside, and mongodb on the database side.

In addition to developing business layers in these projects, I was also responsible for giving advice to my colleague and preparing documentation, installing and maintaining the projects on git.
